Step 3: Set a Strong Password

A screenshot of the Bitwarden password setup screen. At the top center is a blue padlock icon with a yellow password field containing three asterisks. Below it, the text "Set a strong password" is centered. Underneath that, a sub-instruction reads "Finish creating your account by setting a password".

The form consists of several input fields:

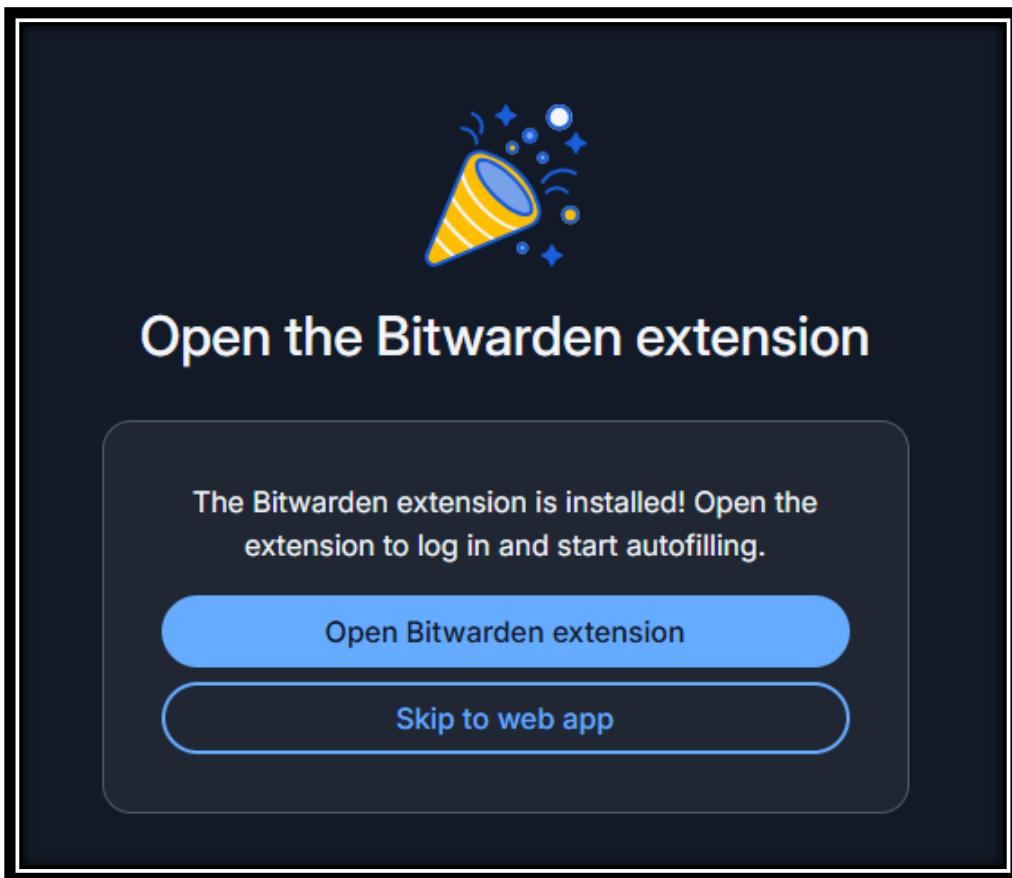

- "Master password (required)" with an eye icon to the right.
- A note below it: "Important: Your master password cannot be recovered if you forget it! 12 character minimum." followed by a long redacted password field.
- "Confirm master password (required)" with an eye icon to the right.
- "Master password hint" with an eye icon to the right.
- A note below it: "If you forget your password, the password hint can be sent to your email. 0/50 character maximum." followed by a long redacted password hint field.
- A checkbox labeled "Check known data breaches for this password" with a checked checkedmark icon.

At the bottom is a large blue "Create account" button.

Account Created!

Step 4: Import Data

Here you can import data you want to

All vaults

Get started

✓ Create an account >

Import data >

If you don't have any data to import, you can create a [new login](#) instead.

✓ Install browser extension >

Use the extension to quickly save logins and auto-fill forms without opening the web app.
